OUR MISSION

REPORT

**NO MEANS NO
NO MATTER WHERE SHE
GOES
NO MATTER WHAT SHE
WEARS**

Stop Harassment. Speak Up. Stay Safe.

Enough Is Enough.

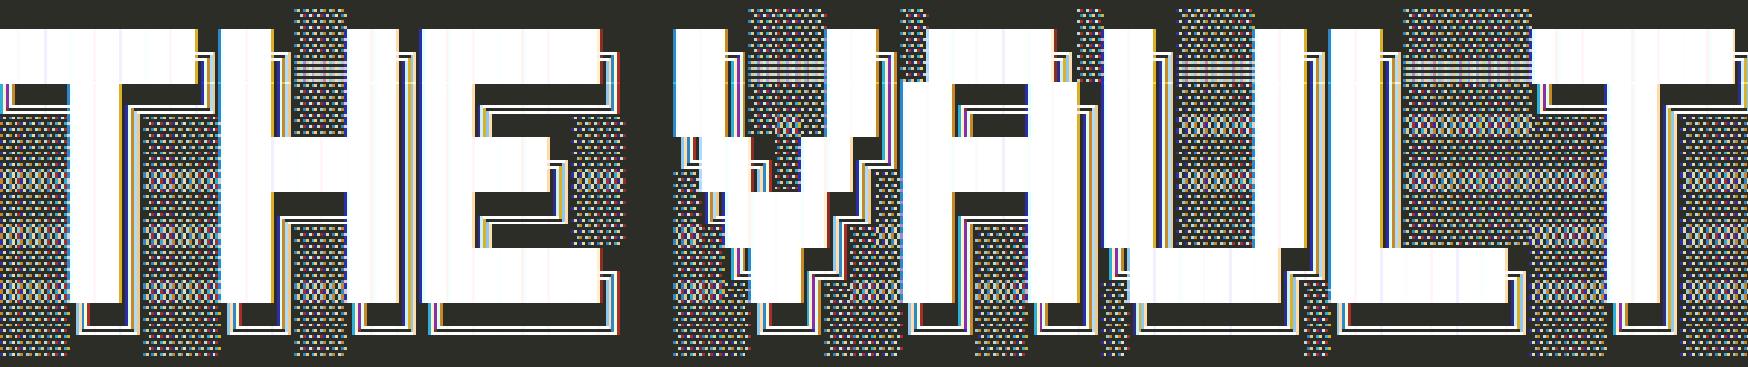

Activist Website

AGAINST WOMEN HARASSMENT

- Built to raise awareness about women's safety through web design
- Designed interactive pages with clean minimalist design.
- Built using HTML, CSS
- Provides Helpline numbers in case of crisis

Terminal

%

WELCOME TO THE VAULT TERMINAL

Here you will have to open the vault by guessing the password.
You have five levels.
Each level the ciphered password will be shown.
You will have to figure out which cipher it is and
DECIPHER it...
Feel free to find cipher translators online and try guessing which type it is
and
eventually get THE DECIPHERED TEXT!!!!!!
If you are stuck after 3 attempts you can opt for a HINT.
BE CAREFUL AND WARY OF OPENING THE VAULT.
I CAN'T GUARANTEE YOUR SAFETY

“The Vault” Game

CODE IN PLACE (STANFORD)

- Interactive logic-based Python game where users apply different ciphering techniques.
- Problem solving and programming
- Submitted it as final project for Code In Place
- Encourages cipher skills and interactive logic learning

Personal Portfolio WEBSITE

- Showcases personal projects and skills
- Focus on responsive and user-friendly design
- Built using HTML, CSS, and modern design principles
- Expression of my creative identity

Hello! I'm CyHelp.

What is your name? Nandhu

Nice to meet you Nandhu

What year is it?

2026

Wow! That means it has been 56 years since Cybersecurity began!

The field of Cybersecurity started in the 1970s when more and more information started being stored on computer systems and networks!

Press enter to continue

Cybersecurity refers to the practices that people use to protect computer systems and networks from cyber attacks.

These people can be governments/nations, individuals, companies, community organizations, and hackers.

The CIA Triad is the model used to discuss cybersecurity. CIA stands for confidentiality, integrity, and availability.

Would you like to learn about the CIA Triad?

Type 'yes' or 'no': yes

What would you like to learn more about? Enter the lowercase letter of the following options:

(a) confidentiality, (b) integrity, (c) availability, or (d) none

a

Confidentiality makes sure data is private.

What would you like to learn more about? Enter the lowercase letter of the following options:

(a) confidentiality, (b) integrity, (c) availability, or (d) none

b

Integrity makes sure data has not been tampered with and can be trusted.

What would you like to learn more about? Enter the lowercase letter of the following options:

(a) confidentiality, (b) integrity, (c) availability, or (d) none

c

Availability makes sure authorized people can access the data.

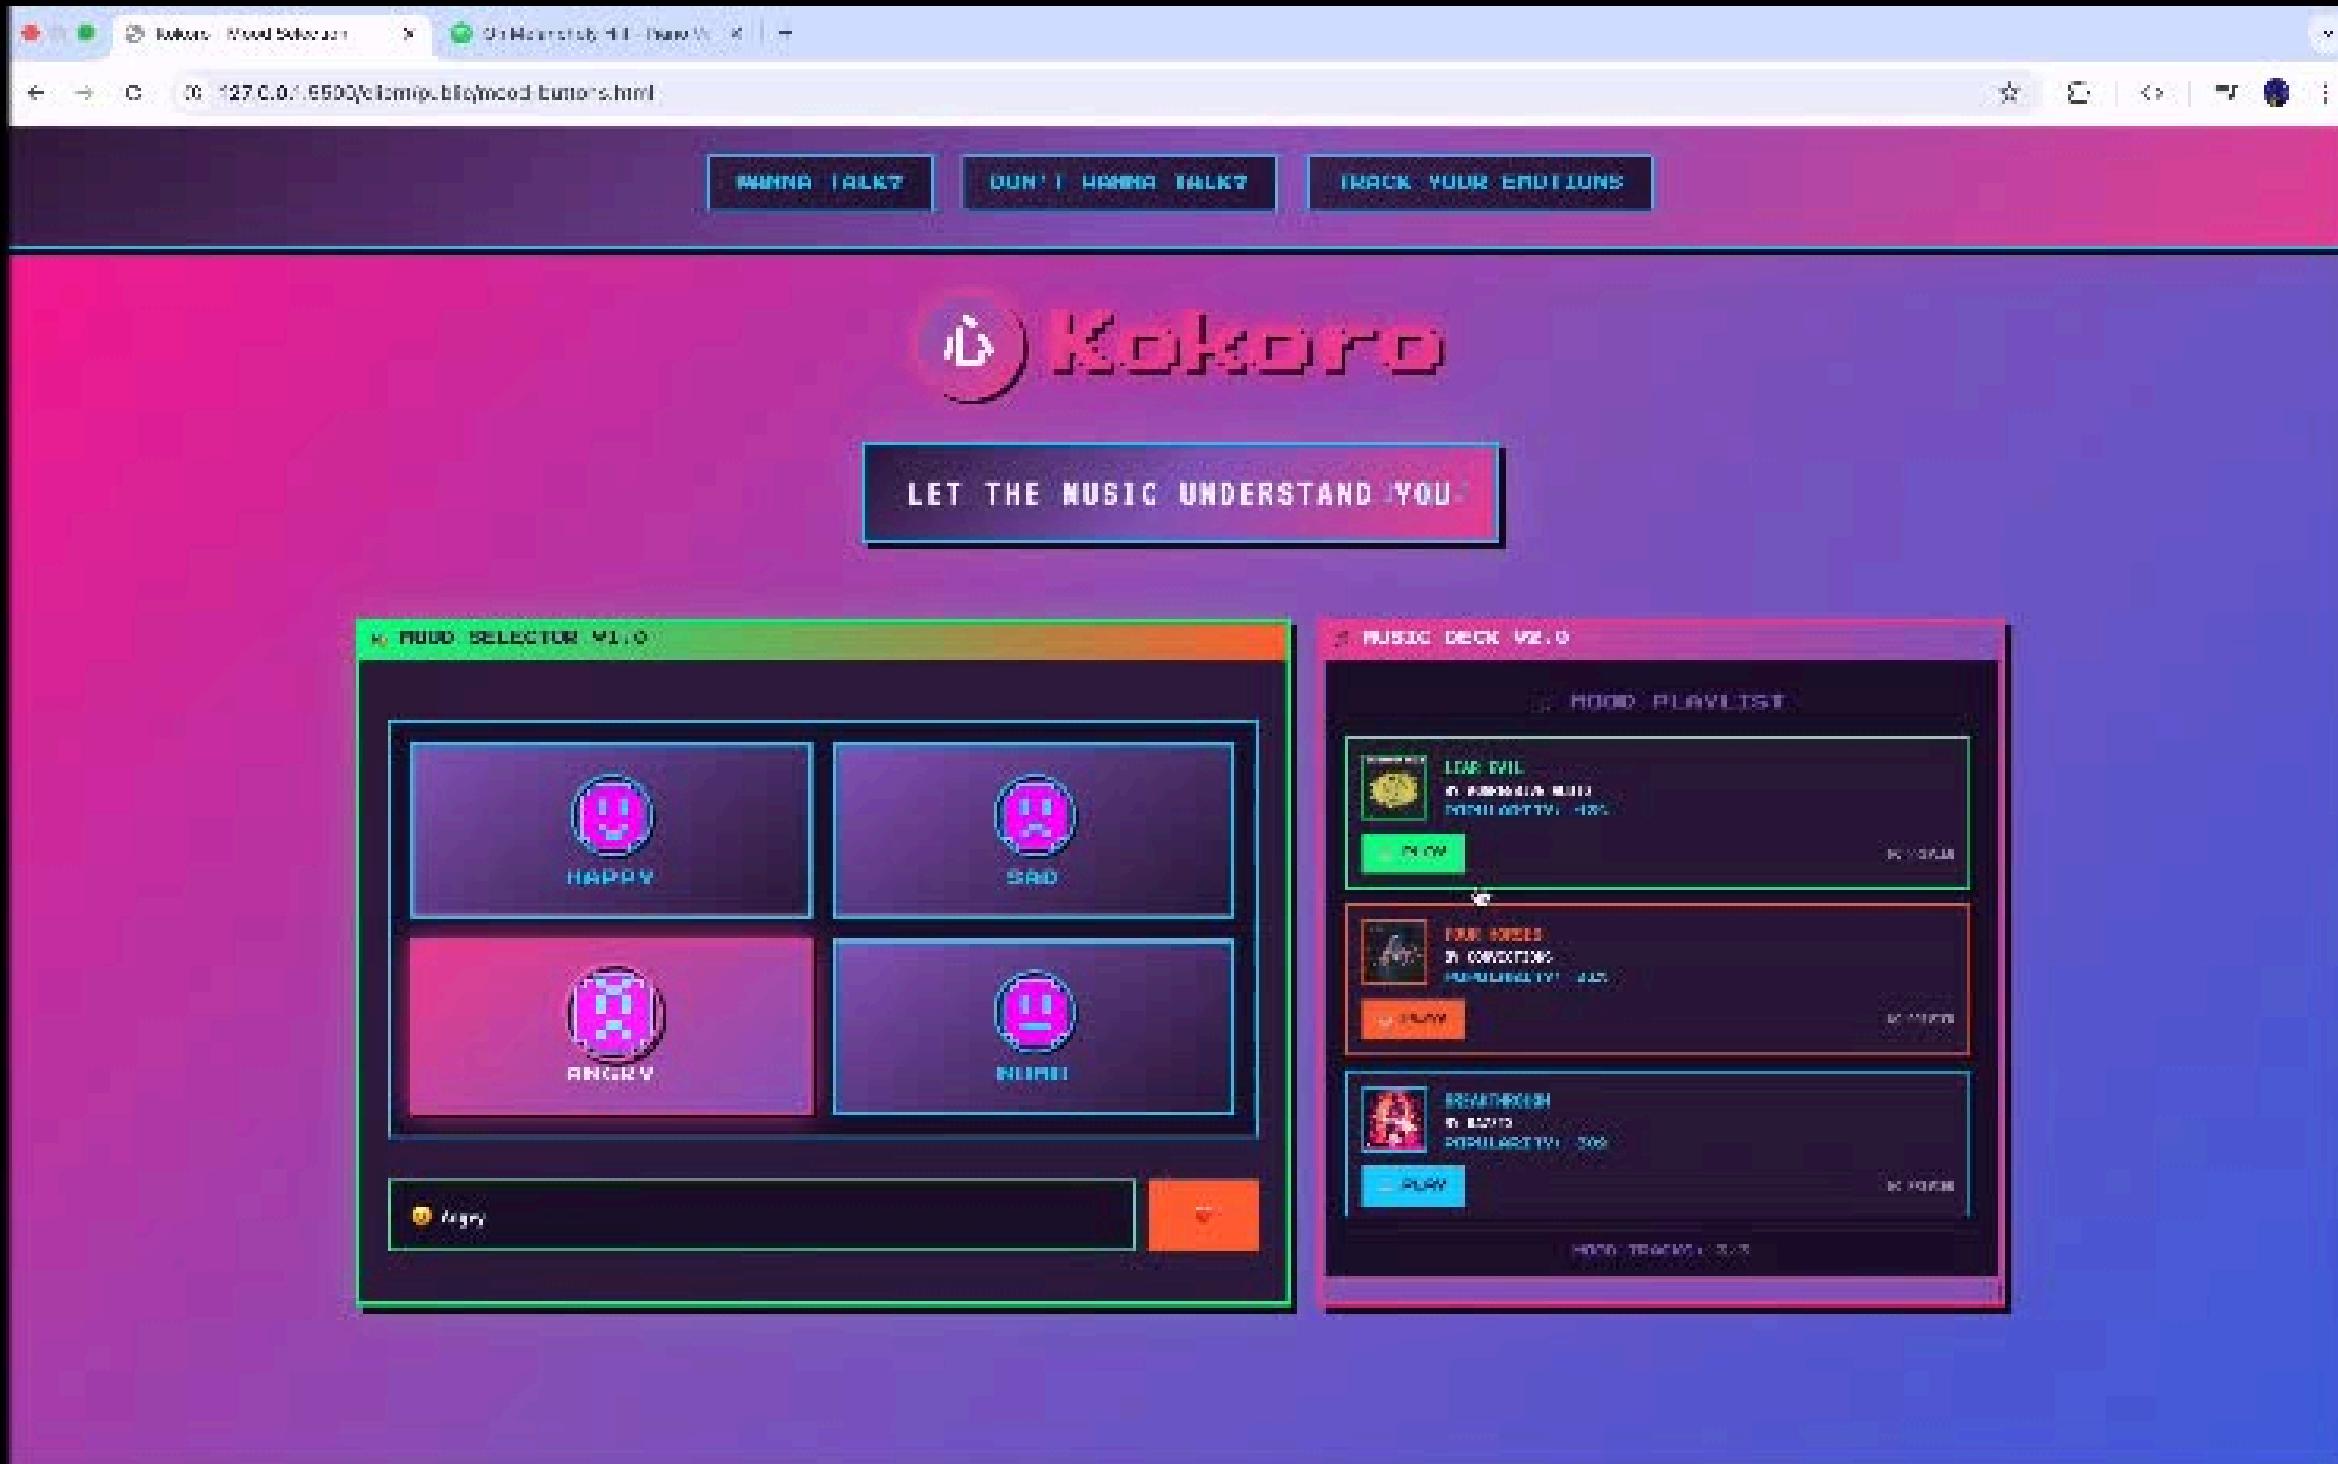

What would you like to learn more about? Enter the lowercase letter of the following options:

(a) confidentiality, (b) integrity, (c) availability, or (d) none

Cybersecurity Project: CYHELP BOT

- Built during a cybersecurity learning module with Girls Who Code using PYTHON
- Explains CIA Triad
- User Interaction : Users type responses to explore topics for an interactive learning experience.
- Simplifies cybersecurity topics in an interactive based learning system.

International Hackathon KOKORO

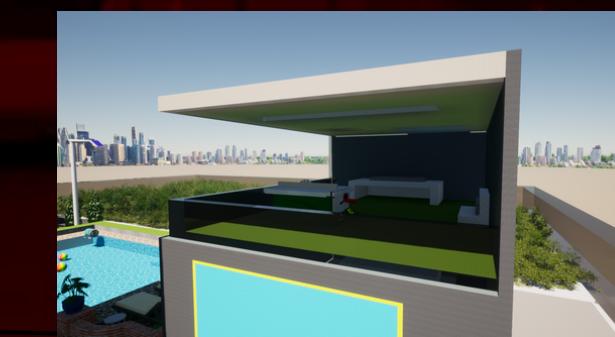

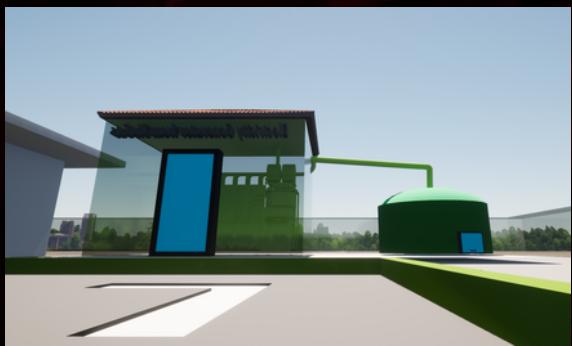

- Built in 48 hours during an international hackathon
- Team project : We won 3 awards
- My role: Frontend development, UI/UX design, product ideation & pitch
- Supports emotional wellbeing through music

Design Hackathon

LOW CARBON FOOTPRINT SUSTAINABLE COMMUNITY

- Integrated solar, biogas, recycling & rainwater systems
- Designed and built in 48 hours as a team challenge
- My role: 3D modeling, visualization & pitchin
- Low-carbon residential concept with self-sustaining housing
